

# Dear Rotel Customer

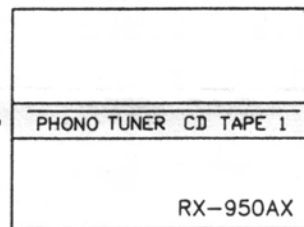

When you are setting up the RR-910 remote for use with your system, please choose the adhesive sticker that matches the model number you own. Attach this sticker to the front face of the RR-910 in the location indicated by the drawing below. This will ensure that the labels and functions are correct for your system. This applies to the RX-950AX.

For users of the RR-910 remote with the RCD-940BX CD player, please attach the adhesive plate provided for CD command functions over the correct area of the remote control. This is shown in the drawing below.

Thank you for buying a Rotel product.

Change this sticker to match your receiver RX-950AX.

CD function adhesive plate for RCD-940BX.
