

2000IFS

Magnetically shielded centre channel loudspeaker system

Product Summary

- The 2000IFS with ZMF completes a whole range of audio components to enable the assembly of a top quality audio/video surround sound system at home.
- The new 2000 IFS centre channel speaker has been designed to facilitate crisp, highly image-specific dialogue reproduction. Its arrival brings an important dimension to voice localisation.

Technical highlights

- As the name of the 2000 Series suggests, these loudspeakers have been designed to meet the needs of the consumer between now and the 21st Century.
- Affordable, high performance audio/video loudspeakers with ZMF (Zero Magnetic Field)
- Contoured front baffle to overcome diffraction
- Acoustically transparent frameless grilles with specially developed low coloration drive units.

Drive Units	1 x 25mm diameter high frequency unit polyimide diaphragm and magnetic fluid cooled voice coil 2 x 165mm bass/midrange with acrylic damped fibre cone, low hysteresis rubber surround and 25mm dia. high temperature voice coil.	Nominal Impedance 8 ohms	Power Handling 25W – 100W into 8 ohms of undistorted speech and music programme
Frequency Response	± 3dB at 95Hz – 20kHz	Dimensions	Height: 150mm Width: 450mm Depth: 240mm
Sensitivity	88dB spl(2.83V,1m)	Finish	Black ash vinyl or White vinyl
