

ASW™500

Active Subwoofer

Product Summary

- Integration within a system is made easy with the provision of line or speaker level connections. Like other ASW subwoofers the ASW 500 is an active vented-box design using a 10-inch long-throw driver. Quality low bass is assured by Flowport™ technology.
- The ASW 500 can improve the power handling and sound of any system by reducing the demands on the existing amplification. It is an ideal choice for smaller rooms but where quality cannot be compromised and its versatility allows it to be used both in a Hi-Fi or AV set-up.

Technical highlights

Flowport™: Golf ball aerodynamics theory points the way towards lower distortion reflex ports. Dimples improve the way the air flows over the surface of any object. In the case of reflex ports, they offer a significant improvement over simply flaring the port ends in reducing air flow turbulence at each end of the port; so you get less chuffing noise and less compression at high sound levels.

Description	Active vented-box subwoofer system with magnetic shielding	Net Weight	12kg (26.5lb)
Drive Unit	1 x 250mm (10 in) dia long-throw drive unit	Dimensions	Height: 415mm Width: 353mm Depth: 401mm
Frequency response	± 3dB at 32Hz and 80Hz	Finishes	Cabinet: Black Ash vinyl Grille: Black cloth
Input impedance	22k		
Amplifier	70W continuous		
Internal Volume	35 litres
