

ASW 855

B&W
Bowers & Wilkins

The Matrix-braced cabinet of the ASW855 accommodates a massive 380mm (15 in) drive unit derived from that in the 801D. The Rohacell®/ carbon fibre sandwich cone material ensures that even this large area moves as a pure piston right through the subwoofer bandwidth and well beyond. Driven by our 1000W Class-D amplifier, this driver can produce prodigious amounts of bass power with absolute control - enough for most large high-end projects. But if more is required, all B&W subwoofers can be daisy-chained in multiples as required. Comprehensive controls are provided so that the subwoofer can be integrated seamlessly into either a multi-channel or 2-channel installation.

Description: Active closed-box subwoofer system

Drive Unit: ø380mm (15 in) Rohacell® cone long-throw

Frequency Range: -6dB at 14Hz and 40 / 140Hz adjustable (EQ at A)

Frequency Response: ±3dB 18Hz - 31 / 110Hz adjustable (EQ at A)

Amplifier : Class D w/switch mode power supply 1000W continuous

Dimensions: H 529mm W 562mm D 522mm
H 20.8 W 22.1 D 20.6”
(not including feet)

Weight: 45kg / 99 lbs.

Finishes: Black Ash, Cherrywood, Rosenut
