

## See nothing, hear everything

CWM8.3 is a three-way, in-wall loudspeaker, conceived to offer the very best performance for a customer requiring great sound, without seeing the source. It features a Carbon Braced Tweeter, a 5in Kevlar® FST™ drive unit and two 7in carbon fibre reinforced Rohacell® low frequency drivers. The central baffle is rotatable, so CWM8.3 can be used in either vertical or horizontal alignment. The BB CWM8.3 back box is required for installation.

## Technical Specifications

<b>Description</b>	<b>3-way in-wall loudspeaker</b> <b>Nautilus™ tube-loaded tweeter</b> <b>Carbon braced tweeter</b> <b>Anti-resonance plug</b> <b>Flowport™</b> <b>FST midrange unit</b>
<b>Technical features</b>	Rohacell bass drivers 1x 25mm (1in) Aluminium Carbon Braced Tweeter with Nautilus Tube™ 1x 130mm (5in) woven blue Kevlar cone FST mid-range driver
