

DM110

Stand-mount/Bookshelf loudspeaker system

Product Summary

- The DM110 is a two-way loudspeaker system acclaimed by reviewers worldwide. Outstanding for its high power handling capacity and super sensitivity.
- When Trevor Attwell of Hi-Fi news reviewed the speaker his comments were “a very neutral uncoloured loudspeaker giving excellent imaging some of the best I have yet heard from moving coil systems at the price – and from some far more expensive ones”

Technical highlights

- Refinements in the enclosure give the DM series reduced in lower mid-band coloration and a dramatic improvement in transient response.
- Advanced optimisation techniques employing modal analysis of the cabinet structure were a design feature of the enclosure in all four monitors.

Drive Units	1 x 26mm dome/coil construction of special polyimide material 1 x 200mm nominal piston dia and 26mm high temperature voice coil with critically impregnated composite short fibre cone	Power Handling	10W – 75W
Frequency Response	± 3dB 70Hz to 20kHz	Dimensions	Height: 490mm Width: 260mm Depth: 250mm
Sensitivity	89dB (2.83V, 1m)	Finish	American Walnut or Black Ash vinyl
