

DM220

Stand-mount/Bookshelf loudspeaker system

Product Summary

- All the distinctive qualities of the DM110 with a third driver extending both frequencies response and power handling.
- Total spectrum capability – pop, jazz, rock or classical. And of course the benefits of B&W's advanced optimisation techniques in the design enclosure. Alvin Gold said "the sense of vividness and expressive nature of the 220 is further proof that B&W have got most of the right answers"

Technical highlights

- Refinements in the enclosure give the DM series reduced in lower mid-band coloration and a dramatic improvement in transient response.
- Advanced optimisation techniques employing modal analysis of the cabinet structure were a design feature of the enclosure in all four monitors.

Drive Units	1 x 26mm dome/coil construction of special polyimide material 2 x 200mm nominal piston dia and 26mm high temperature voice coil with critically impregnated composite short fibre cone	Power Handling	10W – 100W
		Dimensions	Height: 680mm Width: 290mm Depth: 320mm
		Finish	American Walnut or Black Ash vinyl
Frequency Response	± 3dB 53Hz to 20kHz		
Sensitivity	90dB (2.83V, 1m)
