

# P4

## Floor-standing loudspeaker system

### Product Summary

- The P4 is the smallest speaker in the P Series, in order to achieve sufficient bass extension the design engineers at B&W came up with a unique solution.
- The key difference, which is not visible from the outside, is the internal cabinet construction. A folded tapered duct has been used, which is selectively damped to give bass reinforcement similar to a reflex enclosure, without the danger of pipe resonances that would otherwise arise in the tall narrow enclosure.

### Technical highlights

Kevlar®: B&W developed and patented the method of using Kevlar® for loudspeaker cones to reduce unwanted standing waves. DuPont originally created Kevlar® for use in bulletproof vests.

<b>Description</b>	2 way 4th order tapered-line	<b>Power Handling</b>	30W –100W into 8 ohms on unclipped programme
<b>Drive Units</b>	1 x 25mm metal dome · high frequency 1 x 165mm woven Kevlar® cone bass/midrange	<b>Dimensions</b>	Height: 810mm Width: 200mm Depth: 256mm
<b>Frequency Response</b>	50Hz – 20Hz ±2dB on reference axis	<b>Finish</b>	Black Ash, Rosenut, Cherrywood Grille: Black Cloth
<b>Sensitivity</b>	88dB spl(2.83V 2m)		
<b>Nominal Impedance</b>	8 ohms (minimum 3.7 ohms)
