

202i

Stand-mount/Bookshelf loudspeaker system

Product Summary

- The 200 series was deemed as the rarity in the mass consumer hi-fi market – a reasonably priced loudspeaker that provided high sensitivity, extended linear frequency response and pinpoint stereo imaging.
- The 202i loudspeaker system is a fourth-order vented loudspeaker system. The speaker comprises of a $\frac{3}{4}$ -in high frequency with a polyamide dome and one 7in low frequency polypropylene cone.
- The B&W wall bracket accessory permits easy, multi-directional positioning on walls.

Technical highlights

- The Design incorporates a cabinet profile and wedge shaped grilles on acoustically transparent frames.
- The magnetic fluid-cooled voice coils are a B&W hallmark, wound on glass reinforced Kapton® formers, enabling the drivers to take the heat when reproducing modern digital recordings.
- In common with B&W tweeters, the lightweight units incorporate low viscosity magnetic fluids to offer excellent power handling and linearity.
