

# XT4

# B&W

Bowers & Wilkins

The XT4 is the perfect solution when contemporary design, minimal visual bulk and outstanding performance are all top of list. XT4 boasts an immensely rigid one-piece extruded aluminium enclosure which carries a top mounted Nautilus™ tube loaded 25mm aluminium dome tweeter, a 130mm Kevlar® cone midrange driver, and twin Flowport™ loaded, composite paper/Kevlar® cone bass drivers. The twin bass drivers provide low frequency bandwidth and power handling in abundance giving the XT4 a real sense of scale and dynamics.

Locating the Nautilus™ tweeter module on the top of the enclosure achieves perfect, head high positioning, provides wider dispersion for a better image stability, and allows correct phase integration with the midrange driver. And the acoustic quality inherent in the drivers along with the minimal enclosure contribution means that the crossover circuits can be simplified and each separate component optimised by ear for ultimate sound quality.

In either AV front speaker or conventional stereo system roles the XT4's combination of performance and aesthetic style is unrivalled. Genuine high-end hi-fi with a contemporary aesthetic.

<i>Description</i>	3-way vented-box system	<i>Drive Units</i>	<i>Unit 1:</i> 1x 25mm (1 in) aluminium dome high-frequency <i>Unit 2:</i> 1x 130mm (5 in) woven Kevlar® cone midrange <i>Unit 3:</i> 2x 130mm (5 in) Paper/Kevlar® cone bass
<i>Frequency Range</i>	-6dB at 34Hz and 50kHz		
<i>Frequency Response</i>	40Hz - 22kHz ±3dB on reference axis		
<i>Sensitivity</i>	86dB spl (2.83V, 1m)		
<i>Normal Impedance</i>	8 ohms (minimum 3.1 ohms)	<i>Dispersion</i>	<i>Description:</i> Within 2dB of reference response <i>Horizontal:</i> over 60° arc <i>Vertical:</i> over 10° arc
<i>Power Handling</i>	50W - 150W into 8 ohms on unclipped programme
