

Form and Function

Fixed to a wall or positioned on a table or shelf on its own ultra-stable rubberised support, the XTC is a two-way system incorporating twin Kevlar® cone bass/midrange drivers and a centrally mounted Nautilus™ tube-loaded aluminium dome tweeter. Unusually for a centre speaker, a pair of XTCs can be used in vertical orientation as front speakers, mounted to the wall on either side of the screen using the wave bracket that comes as standard in the box.
