

CLASSÉ

OMEGA OMICRON MONO

POWER AMPLIFIER

The Omega Omicron is a scaled-down Omega Mono, beautifully executed to preserve every technical and sonic advantage. It successfully combines subtlety and nuance—commonly associated with low-output amplifiers—with the control and authority that only come with real power. The Omega Omicron is fully balanced from input to output, boasts a massive, fully regulated power supply, over-built output stage and numerous other design details shared with the larger and more costly Omega Mono.

And no amplifier joins the Classé family of elite sonic performers without going several steps beyond technical sophistication. The Omega Omicron benefits from hundreds of hours of listening where every aspect of the design is proven and refined. Component parts, circuit layout and the multilayer circuit boards themselves were all selected on the basis of their contribution to the sonic excellence of the amplifier.

Although it appears almost petite beside its bigger brother, the Omega Omicron is a true power-house. It is rated at 300W into 8 ohms and delivers 600W into 4 ohms and 1,200W into 2 ohms. Were a speaker to require it, the impressive supply and output stage of the Omega Omicron is stable below 1 ohm and capable of delivering over 1,800W.

Specifications

Model	Omega Omicron Mono
Voltage gain	29 dB
Sensitivity	2.25 Vrms
Bandwidth	20Hz to 20Khz +/- 0.1dB
THD + noise	0.003%
Rated Output	300 Watts @ 8 Ohms 600 Watts @ 4 Ohms 1200 Watts @ 2 Ohms
S/N ratio	135 dBR
Input Impedance	100 Kohms
Output Impedance	0.017 ohms

Main Unit Dimensions

Height	16.5" (41.9cm)
Depth	19.5" (49.5cm)
Width	10.0" (25.4cm)
Weight	108lbs (54kg)

Shipping Case Dimensions

Height	18" (45.8cm)
Depth	26" (66cm)
Width	28" (71cm)
Weight	135lbs (61.2kg)
