

ASW 825

B&W
Bowers & Wilkins

The ASW825's 12" driver features our ultra-rigid Rohacell® sandwich cone that can move prodigious amounts of air with almost perfect piston-like control. It has a 4" diameter voice coil and massive magnet assembly for high power handling without compression, which enables the subwoofer to produce true low-frequency sounds, from the subtle recreation of the acoustic of a large space to the most demanding film special effect.

Powering this driver with consummate ease is our 1000W amplifier module; its Class-D operation and switch mode power supply offering efficient performance, with little energy wasted as heat.

Comprehensive controls are provided so that the subwoofer can be integrated seamlessly into either a multi-channel or 2-channel installation.

Description: active closed-box subwoofer system

Drive Unit: Ø300mm (12") Rohacell® cone long-throw

Frequency Range: -6dB at 15Hz and 40/140Hz adjustable (EQ at A)

Frequency Response: ±3dB 20Hz - 31/110Hz adjustable (EQ at A)

Amplifier: 1000W Class-D with switch mode power supply

Dimensions: H 529mm W 476mm D 351mm
H 20.8" W 18.7" D 13.8"
(not including feet)

Weight: 35 kg / 77 lbs.

Finishes: Cherrywood, Rosenut, Black Ash
