

DM100i

Stand-mount/Bookshelf loudspeaker system

Product Summary

- The DM100 is a compact 2-way system described as a perfect example of what might be called small room sound technology
- Computer technology ensures components are kept to a minimum in the crossover.

Technical highlights

- Modal analysis techniques revealed a simple bonding technique of corner joints could improve rigidity and reduce coloration.
- New thinking on crossover design has also led to the provision of higher safe power handling and fuse protection overload.
- The driver chassis have non-magnetised castings for all the bass midrange units ensuring resonant free high-level sound of the highest amplitude.

Drive Units	1 x 26mm high-frequency driver with dome/coil construction of special polyimide material	Sensitivity	89dB spl (2.83V, 1m)
	1 x 150mm nominal piston dia and 26mm high temperature voice coil with critically impregnated composite short fibre cone	Power Handling	10W – 75W
		Dimensions	Height: 370mm Width: 220mm Depth: 210mm
		Finish	American Walnut or Black Ash vinyl
Frequency Response	± 3dB 80Hz to 20kHz
