Bowers & Wilkins

For home theatre systems in small to medium-sized rooms, where it can team up with a pair of 684 floorstanders or 685 bookshelf units in the front positions, the HTM62 offers outstanding centre speaker performance.

Its symmetrical design allows for horizontal orientation or vertical, if room is running out. Twin 130mm Kevlar® bass/midrange units sit either side of a Nautilus™ tube-loaded tweeter, making a presence powerful enough to match the main speakers in the room.
