

THE MINIPOD

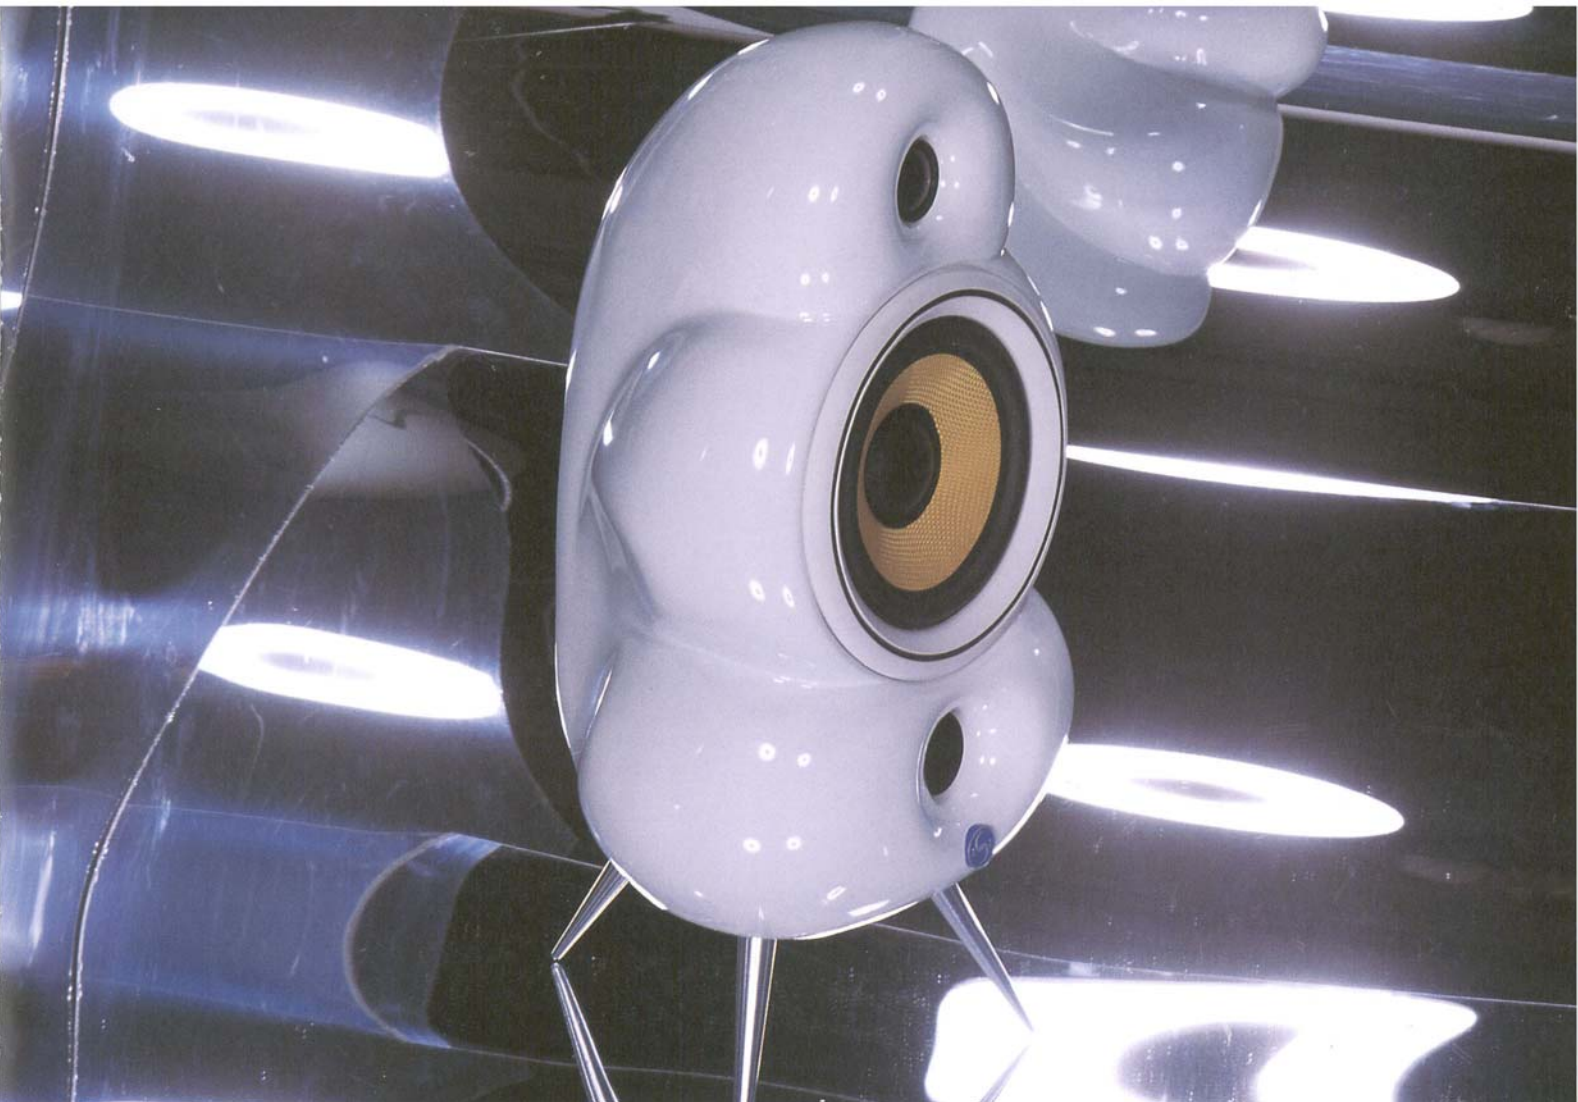

THE BLUE ROOM ALIEN HARDWARE AND SOFTWARE COLLECTION

The Minipod

The Minipod is the newest installation in Blue Room's Alien Hardware Collection. Featuring the same award-winning design and next generation materials as the House and Techno Pod, the Minipod is a bookshelf model that captures the essence of Blue Room's sci fi-hi fi audio concept. The Minipod is acoustically engineered by world renowned B&W loudspeakers and features B&W's patented Kevlar® cone technology. The distinct shape and sound of the Minipod is a fully realized, boldly original cyber-organic experience. Whether your soundtrack is fiercest jungle techno or the subtlest ambient excursion, the Minipod will enhance the material beyond any expectations.

Minipod is available in black, white, blue and red finishes with complimentary speaker rings. The Sputnik stands are included with each pair.

Specifications **System Type** 2-way 4th-order vented box system **Drive Units** one 130mm (5in) dia bass/midrange with Kevlar® diaphragm and 26mm (1in) dia high power voice coil on Kapton® former. One 26mm (1in) dia free-mounted high-frequency with aluminium dome, high-power voice coil and magnetic fluid cooling **Power** Suitable for use with amplifiers of between 15-100w output into 4Ω on unclipped speech and music programme **Frequency Range** -6dB at 70Hz and 30kHz **Free-Field Response** Reference Axis $\pm 3\text{dB}$, 80Hz - 22kHz Within 2dB of response on reference axis as follows: **Horizontal** over 60° arc (normally 40°) **Vertical** over 30° arc (normally 10°) **Sensitivity** 89dB spl (2.83V at 1m) **Nominal Impedance** 8Ω (minimum 4Ω) **Crossover frequency** 3kHz **Distortion** 2nd & 3rd Harmonics <1% 80Hz -20kHz (90dB spl, 1m) **Dimensions** **Height** 340mm (13 1/2in) (Include tweeter on top but not spikes) **Width** 210mm (8 3/8 in) **Depth** 220mm (8 5/8 in) (Include grille and terminals) **Weight** 2.75kg (6lb) **Colours** 2-pack Acrylic standard colours Black/Blue/White/Red
