

## Form and Function

Either on a bookshelf, floor stand or fixed to a wall, the versatile XT2 performs brilliantly both in a stereo set up and providing the front or rear channels in an AV system. The XT2 features a Nautilus™ tube-loaded aluminium dome tweeter, positioned on top of the speaker cabinet for better image stability. A single Kevlar® cone driver handles the midrange and the bass. As with all XT speakers, the body is formed from a single, seamless piece of extruded aluminium, creating an immensely rigid, stable enclosure and reducing cabinet coloration almost to zero.
